**STEP 2:** Inspector replies "permission granted."

**STEP 3:** Drill CC then gives commands to move flight off drill pad.

All of the movements above must be done with exacting precision. Additionally, the flight leader is reserved to a 50' x 50' drill area in which to carry out all of the commands. Precision and promptness are two critical keys to successful execution of the drill moves. Upon completion of the commands, the flight leader and the flight should be positioned exactly where they started, three paces from the inspector.

The key to successful completion of the regulation drill is PRACTICE, PRACTICE and more PRACTICE.
